

# Grocery Guru

## FEATURES

### Recipes

Search for a recipe from our database or upload one of your own. Review, save, or share recipes!

### Grocery List

Create a list using the ingredients from the recipes of your choice. Add, remove, or modify items on the list.

### Calendar

Customize your own meal-planning calendar for each meal of the day, week, or month!

### Ruby on Rails

Web application built with Ruby on Rails and a model, view, controller architecture.

### Python

Store integration makes use of Selenium WebDriver through a Python Flask server.

### HTML, CSS, JavaScript

Front end views of the application were stylized with HTML and CSS and our user experience was enhanced with JavaScript.

## TECHNOLOGY

## REACH US

### Our Website

<http://groceryguru.herokuapp.com>

### Email

[officialgroceryguru@gmail.com](mailto:officialgroceryguru@gmail.com)

Our **MISSION** is to take the hassle out of cooking. We aim to remove the unnecessary burdens of home-cooked meals by providing our users with the technology to quickly and easily plan meals and get groceries.
