

# PIPELINE

## CAREER EXPO

SEPTEMBER 14, 2018

### WHAT COMPUTING AND DATA CHALLENGES ARE YOU FACING?

The University of Utah's School of Computing has deep roots in Utah's burgeoning technology community. We want to partner with the private sector in creating value in Utah.

#### **How can the School of Computing help advance your business?**

The School of Computing is committed to helping advance the state's economic development and IT initiatives. It is a high priority that we partner with the private sector to develop a highly skilled workforce capable of meeting the demands of an ever-changing technology ecosystem.

#### **Do you have diversity or other pipeline issues?**

Whether you want to hire new graduates or continue the education of your existing workforce, we have solutions.

The School of Computing is nationally recognized as a Tier 1 research organization. We have world-class teaching faculty who are devoted to providing Utah students with a highly respected and sought-after education in computing and data science.

#### **How we can advance your business:**

- On site continuing education
- Internships
- Career Expo
- Capstone Projects
- Sponsored Research
- Diversity Partnerships
